Working with Presentations and Slides

BACKGROUND INFORMATION FOR LEARNERS

PowerPoint files are called *presentations* and it has filename extension of *.pptx*.

PowerPoint presentations are made up of series of *slides*. Slide is a single page of a presentation that may contain the information to present to audience. This might include text, pictures, and charts.

Creating Presentations

Whenever to start a new project in PowerPoint, to *create a new document* is needed, which can either be blank or from a template. In addition, it is needed to know how to *open an existing document*.

To create a new presentation

1. Select the *File* tab>*Backstage view*.
2. Select *New* > *Blank Presentation* or choose the desired *theme*.
3. A new presentation will appear.

To open an existing presentation

1. Navigate to *Backstage view*> *Open*.
2. Select *Computer*> *Browse*.
3. Locate and select presentation>*Open*.

To create a new presentation from a template

A *template* is a *predesigned presentation* that can be used to create a new slide show quickly.

Templates often include *custom formatting* and *designs*, so they can save a lot of time and effort when starting a new project.

SAVING PRESENTATIONS

4 Whenever creating a new presentation in PowerPoint, it is needed to know how to **save** in order to access and edit it for later use.

Save and Save As

PowerPoint has two ways of saving a file: *Save* and *Save As*. These choices work in alike ways with a few significant differences:

Save: When saving a file for the first time, type the filename and select the location where to save. When created or edited a presentation, use the *Save* command to save changes and use this command most of the time. *Save* command can also access by pressing *Ctrl+S*.

Save As: Use this command to create a *copy* of a presentation while keeping the original. When using *Save As*, choose a different name and/or location for the copied version. *Save As* command can also access by pressing *F12*.

To save a presentation

1. *Quick Access Toolbar* > *Save* command
2. If saving the file for the first time, the *Save As* pane will appear in *Backstage view*.
3. Choose *where to save* the file and give it a *file name* then click *Save*.

*I think that I shall never see
A poem lovely as a tree.
A tree whose hungry mouth is prest
Against the earth's sweet flowing breast;
A tree that looks at God all day,
And lifts her leafy arms to pray;
A tree that may in Summer wear
A nest of robins in her hair;
Upon whose bosom snow has lain;
Who intimately lives with rain.
Poems are made by fools like me,
But only God can make a tree.*
