Getting Started with Word

Name _____ of _____ Learner: _____ Date: _____
_____ Grade Level _____

/Section: _____

BACKGROUND INFORMATION FOR LEARNERS

The origination of writing plays an important role in the growth of word processing history from ancient time up to modernized time. With the written word, it had been able to preserve the knowledge and pass it to the next generation.

MS Word is one of the *MS Office Packages* which is purposely use in processing and generating documents such as letters, journals, reports, and other office or school written materials. The _____ program come up with special features that make preparation of documents easier, faster, and better looking.

INTRODUCTION

The *MS Office Word* or simply *Word* has significantly affected the way the documents are prepared nowadays. It can be described as revolutionary due to its popularity and usefulness in almost every part of modern life. With the introduction of several enriched features including the ability to create and collaborate on documents online, *Word 2013* has the ability to do more with Word Processing projects.

MOVING AROUND THE WORD SCREEN

When opening Word 2013, the *Word Start Screen* will appear. At this point, creating new document, choosing template, or accessing the *recently edited documents* are possible.

From *Word Start Screen*, select *Blank document* to access the Word interface.

This lesson will introduce the Word Window. Use this window to interact with Word. To start the lesson, open Word 2013.

The Microsoft Word Window will appear and the screen looks like as shown below:

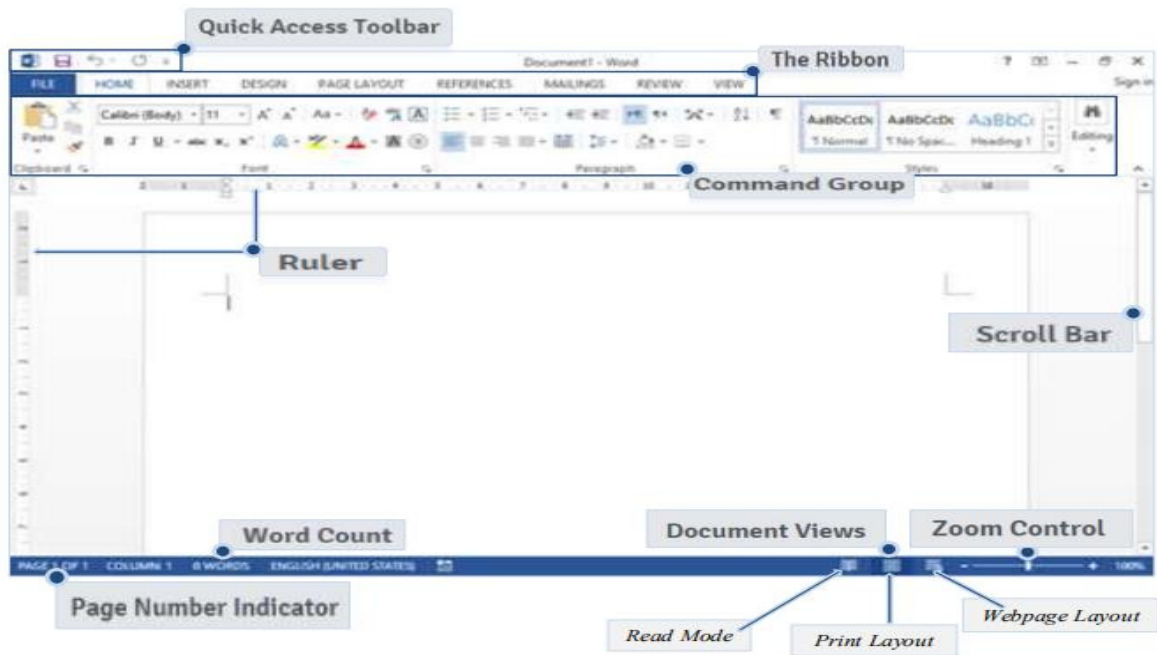

Figure 2. MS Word Window

Quick Access Toolbar

The *Quick Access Toolbar* lets the user access common commands whatever which tab is being selected. By default, the Save, Undo, and Redo commands are included.

The Ribbon

The *Ribbon* comprises all of the commands needed to perform common tasks in Word. It has multiple tabs wherein each has several groups of commands.

Command Group

Each group contains a sequence of different commands. By simply clicking any command, it easily applies it in a document. Some groups have an arrow in the bottom right corner that can be clicked to see more commands.

Ruler

It is located at the top of the document. It makes the document easier to align and to adjust spaces.

Scroll Bar

To view through the pages of document click, hold, and drag the scroll bar up and down and/or left and right.

Page Number Indicator

This will help tracking the number of pages in the document it contain. By clicking the page number indicator, it will open the document navigation pane. Search the document by headings and/or scroll through the pages.

Word Count

It displays the number of words within a document. Click Word Count to open the *Word Count Dialog box*. Statistics of document such as the number of pages, words, characters, paragraphs, and lines can be viewed easily.

Document Views

The three ways to view the document.

Read Mode displays document in full-screen mode.

Print Layout is selected by default and it shows the document as what it would appear if it was printed.

Webpage Layout shows how the document appear as a webpage look.

Zoom Control

To use the zoom control: click, hold, and drag the slider. The number on the right of the slider bar shows the zoom percentage.

OVERVIEW OF THE USER INTERFACE 1.

RIBBON

Located at the top of the window, a *ribbon* is a command bar that contains multiple tabs and organizes a program's features into a series of tabs performing the common tasks in Word. Using ribbon, it increases the ability to discover features and functions that lead to a quicker learning on a program.

The *HOME* tab gives access to the most frequently use commands when working with Word 2013, which include copy and paste, font, paragraph aligning, and selecting document styles. It is a default tab when opening Word.

Republic of the Philippines
Department of Education
REGION III
SCHOOLS DIVISION OFFICE OF NUEVA ECIJA

The *INSERT* tab allows inserting tables, pictures, charts, shapes, and cover pages which can help add style and communicate information visually to the document.

The *DESIGN* tab gives access to a range of design tools like document formatting, page borders, and effects which can give a polished look document.

The *PAGE LAYOUT* tab allows changing print formatting of document such as margin width, page breaks, and page orientation. These commands are useful in printing the document.

The *REFERENCES* tab allows adding annotations: footnotes and citations, table of contents, captions, and a bibliography in a document. These commands are useful when writing academic papers.

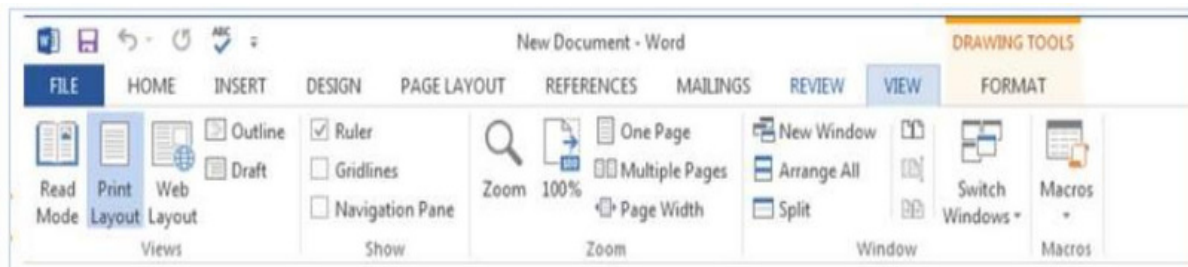

The *MAILINGS* tab uses mail merge component for easily composing letters, creating labels, and addressing envelopes. This is suitable when sending a letter to some recipients.

The *REVIEW* tab is use to access the powerful editing features of Word which include tracking changes and adding comments that make it easy sharing and collaborating on documents.

The *VIEW* tab allows switching among different document views and split the screen to view two parts of document at one time. These commands are also useful to prepare printing documents.

The *CONTEXTUAL* tabs appear on the Ribbon when working with some items such as table and picture. These tabs have special command groups that can help format items as needed.

2. QUICK ACCESS TOOLBAR (QAT)

It is a toolbar that contains set of commands that are independent of the tab on the ribbon that is presently displayed. It can be moved from one of the two possible locations and can be added buttons representing commands to the QAT.

To add commands on QAT:

1. Click drop *down arrow* into the right of the *QAT*.
2. Select the command to add and when to choose from more commands, select *More Commands*.
3. The command will now be added to *QAT*.

3. MINI TOOLBAR

Mini toolbar is a smaller version of the full toolbar found near the top of the application window. It appears when the text is highlighted and move the mouse cursor over either the highlighted text or right click on the highlighted text. The mini toolbar presents some of the most frequently used text editing functions which include as shown below:

4. SHORTCUT MENUS

Right clicking an object activates a *shortcut menu*.

5. NAVIGATION PANE

The *Navigation Pane* allows to jump around the document in a number of ways. Use it in finding Word objects, text, tables and graphics, and jumping to particular headings and pages.

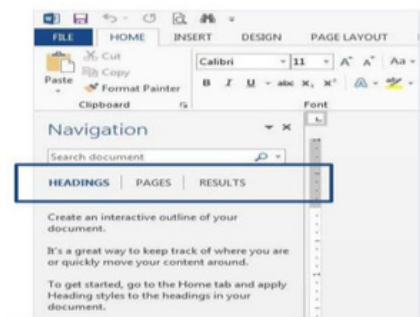

The Navigation pane helps to navigate easily through Word document. By default, the Navigation pane is hidden and is not available in Word 2007.

The two ways to open the *Navigation* pane are as follows:

1. From VIEW tab, check the *Navigation Pane* in the show group:

2. On keyboard press CTRL+F. Use this method if going to search for text in a document. It has three tabs wherein each of which has used for different purposes:
